

# Evaluation

We are very curious to hear your feedback on the seminar, so we have arranged a Delphi evaluation.

Three phases:

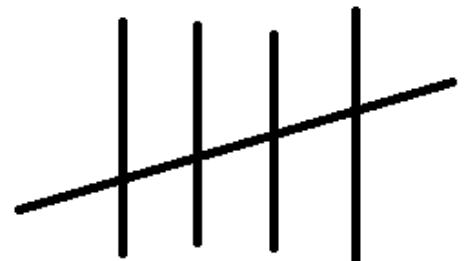

1. You receive a blank sheet of paper.
  - Draw a horizontal line in the middle of it
2. Write up to three positive things in the upper half and up to three negative things in the lower half.
  - All the feedback you provide is anonymous.
3. Vote on what you agree on what others say.
  - The papers circulate **clockwise** to your neighbour, connecting two rows
  - Vote on each topic you agree with by placing **one** line
  - Once you receive your own paper again, we are done.

---

Now, we (TAs, Jens, and Helge) will collect all the papers and we will:

1. Collect the top-voted topics/issues
2. We come back and discuss the concerns together

Finally, we will summarise it all in a report.
